Now you can reset your password in one click! Steps: 1) Sign into your Facebook account and click on Account Settings from "All". 8. Select "Login Sec" tab 9. Select "Reset your password" tab 10) Enter the username or e-mail you used to open your account 11) Click on the Reset Password Button 12) A new page will appear, which contains a temporary password. 13) Connect to your account with this temporary password or simply click on any Open Facebook link or email you see at that moment. 14). Your normal password for Facebook will be changed again 15) Now you can set up a new, secure password! 8 Ways to Improve Your Password Security Keeping your passwords secure is the first key step in protecting yourself from hackers and thieves. If a bad guy gets a hold of even a single password, you could have all sorts of problems down the line. This article will list 8 ways to create stronger passwords that are also easy for you to remember. 1. Use long passwords. Long passwords are often harder for hackers to crack, because they need to use more time and effort if they want to break in. A good rule of thumb is to use a password at least 12 characters in length, but 20 or 25 characters if possible. That way it's harder for hackers to guess correctly and easier for you to remember your password! 2. Make your passwords random strings of letters and numbers.
