
This is actually a very quirky and interesting story. I think it is worth reading for people with a sense of humour and who like to read stories about different cultures.

Oddly enough, the story starts with someone telling you what they got up to on a very specific day in their life which is kind of confusing at first but then the main character wakes up from a nap after having some strange dreams involving some really weird things that defies all comprehension or logic. It all gets somewhat confusing after this where you are just hit with lots of stories about what happened that day. The story seems to be nothing more than random fantasies that the main character had but it's done in such an entertaining way that you can't help but smile at how bizarre the story gets. The main twist at the end though is quite hilarious.

The story is told in a really light hearted way which was perfect for its subject matter, making it feel like something you'd hear on a lazy summer day hanging out. The main character makes really funny observations and thoughts about the most random people which make for some funny descriptions and situations with everyone in them being very relatable. It's also very educational in that you can learn a lot about various cultures. At the end, you get the story told through the eyes of others that were apart of these events and they explain what actually happened. This part adds a lot to how much the story has influenced the world and made it what it is today. It also adds a lot of punch at the end since you have this glimpse into other people's lives and how they got to be where they are now so being able to see where they came from is a really fun thing to do.

There is a lot of social injustice and blatant racism in this story which could be upsetting to some people but the good thing is that you get to see how much it's influenced and shaped so many people in positive ways.

The story is all over the place and has many different stories in one so it could be hard to follow at times depending on your attention span but if you can follow it, it's well worth the read. The format might not be very appealing to everyone though since it's such a strange story that would normally never get made into one like this. I would give this story a 4 out of 5. It wasn't the best written book I have ever read but I liked it because it was so different from anything else I have read. It was very educating about many different things that are foreign to me so I liked being able to learn more about them without losing interest in the story. This story is for people with a good sense of humour who can follow stories that are all over the place. You also have to have an adventurous spirit since you'll be reading about some things you've never thought of before and can't seem to make make sense of.
